INDEX.

VOL. CXVII.

Illustrations.

Names.

A

A.-B. DIESELS MOTORER Engines for the Motor Tank Ship Sebastian, 264, 268
Abbey Mills Sewage Pumping Station (*Supplement, January 2nd*, 1914)
Accrington, Gas Engines and Alternators at, 6 (*Supplement, January 2nd*, 1914)
Acetylene Illuminating Company's Portable Acetylene Welding Outfit, 301
Adnil Electric Company's Equipment for Large Machine Tool Driving, 341
A.E.G. Company's Single-phase Locomotives for the Rhætian Railway, 246
Ailsa Craig 35 H.P. Marine Motor with Starter, 345
Alexanderson, E. F. W., on The Split-phase System, 570, 613
Allen, Edgar, and Co., Double Scissors Crossing in Rolled Manganese Steel for Buenos Aires Great Western Railway, 78
Allen, W. H., Pumping Plant for Hull Joint Dock, 701
America Cup Challenger Shamrock IV., Camper and Nicholson, 601
Ansaldo, Gio., e Co. (*Twenty-eight-page Supplement and Three Four-page Supplements, May 8th*, 1914)
Anteo, Italian Submarine Salvage Vessel, Werf Gusto (A. F. Smulders), 208, 210
Antwerp, Port of, 695
Aquitania, The Cunard Liner, 21, 587, 622, 630 (*Supplement, January 2nd*, 1914)
Archdale Motor-driven Radial Drilling Machine, 406
Armfield, J. J., and Co., Low-head Water Turbine, 544
Armstrong, Whitworth's 10in. Armour Plate for the Spanish Battleship Jaime I., 320
Armstrong, Whitworth 15-Ton Movable Electric Crane, 235
Arum, Motor Ship, Swan, Hunter and Wigham Richardson, 598, 683, 684
Asquith's Vertical Drilling Machine, 620
Asquith's Wall, Radial and Plate and Girder Drills, Motor-driven, 284, 292
Assouan Dam, R. Holt, 631
Austin Marine Motor, 345
Australia, Artesian Water Supply of, 63
Avro Seaplane, 100 H.P. (*Supplement, January 2nd*, 1914)

B

BAILEY, Sir W. H., and Co.'s Automatic Drain Valve for Steam Cylinders, 301
Barr, Mark, on Spiral Gears, 562
Bennis Coal-handling Plant at Southend, 542, 543
Bennis Link Chain Grate Stoker, 699
Berlin-Anhalt Company's Roller Metal Mixer for Steel Works, 591
Berry and Sons, F., Combined Punching, Angle-cutting and Bending Machine, 591
Betulander Automatic Telephone System, 214
Bisson and Renaudin, French Destroyers, 615 (*Two-page Supplement, June 5th*, 1914)
Blackburn Monoplane, 355
Bollinckx Apparatus for Testing Valve Leakage, 208
Bombay Docks, 35
Bonecourt Surface Combustion Process, 525, 557, 585; (Letters), 601, 648, 685, 713
Boulton and Paul's Small Marine Engines, 318
Bournbrook, Machine Tool Works, H. W. Ward and Co., 400
Brazil, Straker and Co.'s 160 H.P. Djinn Marine Engines, 317
Breslau, German Cruiser, 1909–1910, 227 (*Four-page Supplement, February 27th*, 1914)
Breuer and Schumacher's 10,000-Ton Hydraulic Press at Ansaldo's Works (xviii. *Twenty-eight-page Supplement, and Two-page Supplement, May 8th*, 1914)
Bridgit, Motor-driven Train Ferry for San Francisco, 494
Bristol Biplane Scout, 355
Britannic, White Star Liner, Harland and Wolff, Limited, 238, 240, 257
British Niclausse—*see* Niclausse
British Thomson-Houston Company's Push-button Controller, 179
British Thomson-Houston Motors for Driving in Workshops, 97, 117, 261, 262, 285, 341, 424, 451
British Westinghouse Company's Induction Motors for Tool Driving, 425, 426
Brooke and Co.'s Marine Engines, 317, 319
Brown-Boveri Train-lighting System, 221
Broxburn Sewage Disposal Works, 644, 650
Buenos Aires G.W. Railway, Double Scissors Crossing in Manganese Steel, Edgar Allen and Co., 78
Buenos Aires, Railway Crossing in Manganese Steel, Hadfields, Limited, 480
Bullard Motor-driven Vertical Turret Lathe, 261, 262
Burmeister and Wain's Diesel-engined Ship Fionia, 50
Butler's Bridged Axle for Heavy Vehicles, 176
Butler's Polyphase Commutator Motor, 424, 426
Butler's Swivel Pin Lubrication System, 176
Butler's Vertical Boring and Turning Mill, 272–274; (Correction), 300
Butte, Anaconda and Pacific Railway, Electrification, 445

C

CAIRNROSS, Geared Turbine Cargo Steamer, 21 (*Supplement, January 2nd*, 1914)
Caledon Shipbuilding Company's Motor Tank Ship Sebastian, 264, 268
California, Motor Ship (*Supplement, January 2nd*, 1914)
Cambridge Scientific Instrument Company, Aerodynamic Balance, 541
Canada, Western, Some of the Coalfields of, 627
Canton-Kowloon Railway, 443
Cap Trafalgar, South American Liner, 312
Carson's Chocolate Factory near Bristol, 35: (Correction), 67
"Cascade" Induction Motors, Sandycroft, Limited, 424
Chemin de fer de l'Est Mineral Tank Locomotives with Mestre Superheater, 518, 519
Cheshire, North, Salt Field in, 62
Chicago, 25,000-Kilowatt Turbo-generator for, C. A. Parsons and Co., 9
China, Railways in, 443, 501, 564, 611, 666
Chinese Coalfield, Rope Conveyors at, 64 (*Two-page Supplement, January 16th*, 1914)
Chingford, New Reservoir at, 11 (*Supplement, January 2nd*, 1914)
Chloride Electrical Power Storage Company's Train-lighting Accumulator, 320; (Correction), 362
Churchill Heavy Plain Grinding Machine, 298
Città di Milano, Forlanini Airship (*Supplement, January 2nd*, 1914)
Città di Milano, Forlanini Airship, Destruction of, 421
"C.K." Feed-water Diffuser, Holdsworth and Sons, 630
Claydon Cement Works near Ipswich, 310, 322 (*Two-page Supplement, March 10th*, 1914)
Clayton and Co.'s 4½-Ton Petrol Wagon, 150
Clement-Baynard All-steel Armoured Monoplane, 356
Coire-Arosa Railway, 478, 484
Coolidge X-Ray Tube, 680
Cornigliano Ligure, Ansaldo's Works (xii–xv, *Twenty-eight-page Supplement, May 8th*, 1914)
Courbet, French Battleship (*Supplement, January 2nd*, 1914)
Craven's Motor-driven Armour Plate Planing Machine, 284
Craven Planing Machine with Vickers Motor Drive, 406
Crompton, Col. R. E. B., on Mechanical Engineering Aspects of Road Construction, 55, 81, 109; (Letters), 53
Crusader, with 300 H.P. Brooke Engine, 317, 319
Cunard Liner Aquitania, 21, 587, 622, 630 (*Supplement, January 2nd*, 1914)
Cunliffe and Croom Lathe with Variable-speed Motor, 284, 292
Cunliffe and Croom's Locomotive Wheel Quartering Machine, Driven by Two Motors, 262

D

DAIMLER Company, 2-Ton Commercial Motor Vehicle, 76, 77
Dalby, Professor W. E., on Results of Trials made on a Small Diesel Engine, 395, 464; (Letter), 521
Dalziel Train-lighting System, 221
Datetree, Self-trimming Collier, Antwerp Engineering Company, 626
Denny-Edgecombe Recording Torsionmeters for Turbines, 408
Dewrance, John, on Bronze, 342, 359
Diamond Blower Company's Separator, 546
Dickie, G. W., on The Unsinkable Ship, 163
Dixon Brothers and Hutchinson, 80 H.P. Marine Motor, 345
Djinn Marine Engine, 160 H.P., Pumps and Compressors and Motor Winch, 317
Dorman's Four-cylinder Monobloc Engines, 318, 319
Dowson and Mason Gas Plant Company's By-product Recovery Gas Producer, 296
Dunedin, Twin-screw Tug and Salvage Steamer, Stevenson and Cook, 217

E

ELDICK Lathe Cutting-off Tool, Motogear Engineering Co., 630
Electric Carrier Company's System for Transportation of Mails, 154, 162
Electric and Ordnance Accessories Equipment for Machine Tool Driving, 406
Electromotors Limited, Motors for Driving in Workshops, 117, 201, 202, 204, 260
Elocesser System of Steel Belt Driving, 245
Emanuel Nobel, Motor Ship (*Supplement, January 2nd*, 1914)
Emmet, W. L. R., on Power from Mercury Vapour, 697
Esquimalt, Yarrow's Shipbuilding Works at, 132
Euphrates, Hindia Barrage on the, 87, 100

F

FERGUSON, T., on Train Lighting Systems, 220
Fionia, Motor Ship, Diesel Engines, Burmeister and Wain, 50
Fischer Automatic Coupling for Railway Stock, 482
Forlanini Airship Città di Milano (*Supplement, January 2nd*, 1914)
Forlanini Airship Città di Milano, Destruction of, 421
Foster Strain Meter, 397
Fothergill, H., on Wireless Telegraphy, 628
Fowler, Henry, on Superheating Steam in Locomotives, 66, 95, 127; (Letter), 161
French Battleship Courbet, 18 (*Supplement, January 2nd*, 1914)
French Destroyers Bisson and Renaudin, 615 (*Two-page Supplement, June 5th*, 1914)
Friedrich der Grosse, German Battleship, 1909–1910, 227 (*Four-page Supplement, February 27th*, 1914)
Furka Railway, 694, 706

G

GABRIEL and Co., Lock for Sliding Doors of Railway Carriages, 27
Galway Harbour Improvements, 120
Ganges Bridge, Eastern Bengal Railway, 20 (*Supplement, January 2nd*, 1914)
Garrett, R., and Son's Combined Superheater Engines and Boilers for Cement Works near Ipswich, 310, 322; (Correction), 364 (*Two-page Supplement, March 20th*, 1914)
Gaya Waterworks, 393
Genoa Harbour, Fitting Out Yard, Ansaldo's Works (xxv–xxvii, *Twenty-eight-page Supplement, May 8th*, 1914)
German Battleship Kaiser (*Supplement, January 2nd*, 1914)
German Dreadnought Kronprinz, 328
German Warship Design, Modern, 227 (*Four-page Supplement, February 27th*, 1914)
Giovi Line, Electric Locomotive for, 16, 25 (*Supplement, January 2nd*, 1914)
Giovi Line, Electrification, 16, 25—*see also* Italy
Girod Electric Furnaces at Ansaldo's Works (xvii, xviii, xxiii, *Twenty-eight-page Supplement, May 8th*, 1914)
Giulio Cesare, Italian Battleship (vi, xvi, *Twenty-eight-page Supplement and Two-page Supplement, May 8th*, 1914)
Gladstone Dock, Liverpool, 2 (*Supplement, January 2nd*, 1914)
Glasgow, Meadow Side Granary near, 534, 536, 538
Gleniffer Paraffin Marine Motor, 343
Goeben, German Battle-cruiser, 1909–1910, 227 (*Four-page Supplement, February 27th*, 1914)
Görges Motor Connections, 424
Grahame-White Transport Biplane and Military Biplane, 350, 354
Great Central Railway, Six-coupled Express Superheater Locomotive, 18 (*Supplement, January 2nd*, 1914)
Great Western Railway, Automatic Train Control System, 80
Gresham, James (Portrait), 75
Gridley Four-spindle Automatic Motor-driven Lathe, 202, 204

H

HADFIELD'S Manganese Steel Layout for Buenos Aires, 480
Hagen, Motor Oil-tank Ship (*Supplement, January 2nd*, 1914)
Hallford 4-Ton Petrol Lorry Chassis, 177
Hamburg-Amerika Liner Vaterland, 572
Haniel and Lueg's 15,000-Ton Hydraulic Press at Ansaldo's Works (xviii. *Twenty-eight-page Supplement, and Two-page Supplement, May 8th*, 1914)
Harton Low Staithes Fire, Loading Jib, 191
Harvey, G. and A., Limited, Boring, Tapping, Studding, and Milling Machine, 514, 515
Harvey, G. and A., Limited, Gun Boring Lathe and Locomotive Wheel Lathe with Induction Motor Drive, 452
Harvey, G. and A., Limited, Portable Pipe Flange Drilling Machine, 435
Hawthorn, Leslie and Co.'s Extensions at Hebburn-on-Tyne, 14
Heap and Co., Joshua, Screwing Machines for Direct Electrical Drive, 425, 426
Heathcote Hardness Tester, 561
Heaton, T. T., on Some Modern Methods of Welding, 232, 239, 247
Helgoland, German Battleship, 1908–9, 227 (*Four-page Supplement, February 27th*, 1914)
Henschel and Son's Rotary Snow Plough for the Lötschberg Railway, 460
Herbert, Alfred, Electrically Driven Machine Tools, 201
Herbert's Small Gear Pump, 79
Hick, Hargreaves and Co.'s Central Exhaust Steam Engine, 547
Hill's Control Alarm for Marine Engines, 134
Hindia Barrage on the Euphrates, 87, 100
Holden and Brooke's Five-stage Centrifugal Boiler Feed Pump, Motor-driven, 301
Holdsworth and Sons' "C.K." Feed Water Diffuser, 630
Holmes, J. H., and Co.'s Motor-driven Portable Drills, 507
Holt, R., on the Assouan Dam, 631
Holzer, H., on Graphical Differentiation, 130
Hooton, Cheshire, Water Softening Plant, 654, 685
Hull Joint Dock, 122, 123, 674, 678, 701
Hulse Lathe with Mather and Platt Motor, 117
Humphrey Gas Pumps for Chingford Reservoir, 11 (*Supplement, January 2nd*, 1914)
Hurst, Nelson and Co.'s Special Wagons for Woolwich Arsenal, 617, 618

I

IGRANIC Electric Company's Control Gear for Sewage Filter Beds, 646
Igranic Electric Company's Push Button Control System 163
Igranic Electric Company's Starters and Switch Panels, 260
Imperator, Hamburg-America Liner, 21 (*Supplement, January 2nd*, 1914)
India, Military Car for the G.I.P. Railway, 630
Institution of Civil Engineers, New Building (*Supplement, January 2nd*, 1914)
Ipswich, Cement Works near, 310, 322; (Correction), 364 (*Two-page Supplement, March 20th*, 1914)
Iron Duke, H.M. Battleship, 10 (*Supplement, January 2nd*, 1914)
Italian Battleship Giulio Cesare (vi, xvi, *Twenty-eight-page Supplement, and Two-page Supplement, May 8th*, 1914)
Italian Gun Shields, 6in., Trials of, 602
Italian Submarine Salvage Vessel Anteo, Werf Gusto (A. F. Smulders), 208, 210
Italy, Practical Results of Railway Electrification in, 89, 115, 143, 174—*see also* Giovi

J

JACOMB-HOOD, John Wykeham (Portrait), 287
Jaeger Turbine Air Pump, 408
Jules Henry Converted from Sailing to Motor Ship, 400; (Letter), 463
"Jumper" Pump Controller, Leeds Engineering and Hydraulic Company, 492

270453

K

KAISER, German Battleship (*Supplement, January 2nd*, 1914)
Kaiser, German Battleship, 1909–1910, 227 (*Four-page Supplement, February 27th*, 1914)
Kapp Vibrator, Sandycroft, Limited, 347
Kearns' Motor-driven Horizontal Boring Mills, 260, 284, 292
Kenyon, E., on Power Transmission by Ropes, 436, 592
Khiva, Peninsular and Oriental Liner, 79, 366, 376 (*Two-page Supplement, April 3rd*, 1914)
Kiangsu Railway, 501
King Machine Tool Company's 52in. Boring and Turning Mill, 158
King Orry, Geared Turbine Channel Steamer, 21 (*Supplement, January 2nd*, 1914)
King's College Hospital, Automatic Telephones and Electric Clocks, 243
Kromhout Hot Plate Engine, Perman and Co., 318
Kronprinz, German Dreadnought, 328

L

LANCASHIRE Dynamo and Motor Co.'s Electrical System of Large Machine Tool Driving, 341
Lancashire and Yorkshire Railway Signalling School at Manchester, 42, 46
Lanchester, F. W., on Flying Machine from an Engineering Standpoint, 516, 548
Lanston Monotype Corporation, Visit to the Works, 197, 228, 255
Laurence, Scott and Co.'s Automatic Starters for Heavy Machine Tools, 147
Laurence, Scott Carbon Contact Controller for Motor-driven Lathes, 178
Laurence, Scott's Electrical Equipment for Driving Machine Tools, 147, 178, 179, 285
Laverock, H.M. Torpedo-boat Destroyer, Aground, 286
Leech, Goodall and Co.'s Loading Jib after a Coal Staithe Fire, 191
Leeds Engineering and Hydraulic Company's "Jumper" Pump Control Gear, 492
Leeds Forge Train Lighting System, 221
Liddell, A. A., Freeboard by Formula, 279
Limpsfield Air Lift Pumping Station, 287, 289; (Correction), 364
Lobnitz and Co.'s Dredger for a Siamese Tin Field, 186, 189 (*Two-page Supplement, February 13th*, 1914)
London, Brighton and South Coast Railway, "Baltic" Type Tank Engine, 546; (Letter), 648
London, Brighton and South Coast Railway Mogul Express Goods Engine, 18, 120, 126; (Correction), 153 (*Two-page Coloured Supplement, January 30th*, 1914)
London and North-Western Railway Four-cylinder Non-compound Passenger Engine, Sir Gilbert Claughton, 18, 148, 149, 185 (*Supplement, January 2nd*, 1914)
London and North-Western Railway Locomotive Dynamometer Records, 148, 149, 185; (Letters), 245, 259
London and South-Western Railway Mixed Traffic Locomotive and Tender, 18, 105, 534, 535 (*Two-page Supplement, May 15th*, 1914)
London, Tilbury and Southend (Midland) Railway Six-coupled Tank Engine, 19 (*Supplement, January 2nd*, 1914)
Longridge, Michael, on Breakdowns of Mill Engines, 188
Lötschberg Railway Electric Locomotive, 7 (*Supplement, January 2nd*, 1914)
Lötschberg Railway's Rotary Snow Plough, Henschel and Son, 460
Lötschberg Tunnel, Southern Portal, 7 (*Supplement, January 2nd*, 1914)
Loudon Brothers' 20ft. Planing Machine, 436
Low's Inflammable Gas Escape Detector, 134
"Lux" Storage Cell for Train Lighting, Chloride Electrical Power Storage Company, 320; (Correction), 362

M

McELROY, J. M., on Passenger Transportation in Large Cities, 348, 370; (Letter), 520
MacLaren Brothers' Motor Lifeboats for Atlantic Liners, 460
Maltman's Converted Lathe, 201, 203
Manchester, Commercial Motor Vehicle Exhibition at, 150, 176
Manchester Main Drainage Works, T. de Courcy Meade, 234, 235
Manchester, Mining Exhibition, 681, 698
Manchester, Textile Machinery Exhibition, 383
Manchester, Transportation Problem, J. M. McElroy, 348, 370; (Letter), 520
Martens' Hardness Tester, 281
Mason's Cement Works at Claydon, Ipswich, 310, 322; (Correction), 364 (*Two-page Supplement, March 20th*, 1914)
Massey, B. and S., on Friction Drop Stamps, 658
Mather and Platt's Motors for Electric Driving in Workshops, 96, 117, 146
Mather and Platt's Pumps at Manchester Exhibition, 698
Mather and Platt's Train Lighting System, 221
Meadowside Granary, Glasgow, 534, 536, 538
Merryweather's Portable Petrol-driven Pump, 462
Mersey Railway Tunnel, Proposed, 44
Mestre Superheater, 518, 519
Midland Railway—*see* Somerset and Dorset Joint Railway
Milburn, J., Colliery Shaft Signal Indicator, 700
Milton, J. T., on Present Position of Diesel Engines for Marine Purposes, 395, 437
Mississippi, 300,000 H.P. Hydro-electric Plant on the, 475, 502, 510, 530, 531
Mitcham Hot Bulb Engine, 682
Monobloc Engines, Four-cylinder, W. H. Dorman and Co., Limited, 318, 319
"Moore" By-product Recovery Gas Producer, Dowson and Mason Gas Plant Company, 296
Morley, T. B., on the Theory of the Explosion Gas Turbine, 337
Motogear Engineering Company's Lathe Cutting-off Tool, 630
Müller Condenser, 686
Müller, F., on Dry Cleaning in Furnace Gas Purification, 560

N

NEASDEN Works, Tools Driven by British Thomson-Houston Company's Induction Motors, 451
Neptune, United States Naval Collier, Turbine Control, 573
New York, New Haven and Hartford Railway, Single-phase Working, 450, 488
Niclausse Boiler, 280; (Letter), 463 (*Two-page Supplement, March 13th*, 1914)
Niclausse Boilers at Southend, 542, 543
North Cheshire, Salt Field in, 62
North-Eastern and Hull and Barnsley Railways New Joint Dock at Hull, 122, 123, 674, 678, 701
North-Eastern Railway Express Goods Stumpf Locomotive, 19 (*Supplement, January 2nd*, 1914)
North-Eastern Railway Station at Tyne Dock, 491

O

OLYMPIA Exhibition, Aero and Marine Engines, 317, 326, 343, 350, 354
Ost Friesland, German Battleship, 1908-9, 227 (*Four-page Supplement, February 27th*, 1914)
Othegraven Bogie Suspension Link, 246
Otto Mousted Canal at Southall, 219
Owens, T. G., on Some Questions relating to Battleship Design, 373, 384, 410

P

PARIS–LYONS–MEDITERRANEAN Railway, Four-cylinder Compound Locomotive, 19 (*Supplement, January 2nd*, 1914)
Parsons and Co.'s 25,000-Kilowatt Turbo-generator for Chicago, 9
Parsons Geared Turbine for Driving 4000-Kilowatt Generator, 432 (*Two-page Supplement, April 17th*, 1914)
Parsons Motor Company's Paraffin Marine Engines, 344
Pearn's Device for Trueing up Motor Valves, 52
Pemberton-Billing Seaplane, 354
Peninsular and Oriental Liner Khiva, 79, 366, 376 (*Two-page Supplement, April 3rd*, 1914)
Periodograph Company's Periodograph, 490
Perman and Company's Kromhout Hot Plate Engine, 318
Permutit Water Softening Plant at Hooton, Cheshire, 654, 685
Perry Beadle Flying Boat, 350, 354
Peru, Hydro-electric Engineering in, W. T. Taylor, 68, 72
Pitman's Governor for Water Turbines, 407
Pollock, James, and Co., Aerial Screw Tug, 508
Pollock and McNab's Turret Lathe with Geared Motor, 201, 204
Port Arthur Technical College, Experimental Steam Engine for, 479
Posen, German Battleship, 1907–8, 227 (*Four-page Supplement, February 27th*, 1914)
Powell Planing Machine with British Thomson-Houston Motor and "Fabroil" Pinion, 285
Power Plant Company's Induction Motors for Machine Tool Driving, 452
Prinz Regent Luitpold, German Battleship, 1910-1911, 227 (*Four-page Supplement, February 27th*, 1914)
Pyrenees, Eastern, Single-phase Railway, 642, 670

R

RANGOON River Training Wall, 583, 594
Reavell's Electrically Driven Air Compressor, 576
Record Engineering Company's Two-cycle Petrol-electric Lighting Set, 130; (Letters), 161, 180
Renaudin—*see* Bisson and Renaudin
Rennie, D. W., on The Heat Analysis of an Oil-fired Water-tube Boiler, 472, 499
Reyrolle, A., and Co.'s Heavy Switchgear, 218
Rhætian Railway Single-phase Locomotives, A.E.G. Company, 246
Richards, Geo., and Co.'s Vertical Boring, Turning, and Drilling Machine, 658
Richardson, J., on High-power Diesel Engines for Marine Service, 652, 659; (Letter), 713
Ridley, T. W., New System of Concrete Piling, 489
Robinson, T., and Son, Limited, Adzing and Boring Machine for Railway Sleepers, 296
Robinson, T., and Son's Log Band Saw Mill, 381
Rossiter, J. T., Notes on Centrifugal Pumps, 637, 665
Rothera, L., on Application of Electrical Driving to Existing Rolling Mills, 493
Royce's Cranes for Hull Joint Dock, 703, 704
Ruston, Proctor's Suction Gas Plant for Electric Power Station at Valparaiso, 399, 402

S

SALMSON Aeronautical Motor, 326
Sampiardarena Works, Gio. Ansaldo e Co. (i, iii-xii, *Twenty-eight-page Supplement, May 8th*, 1914)
Sandycroft's "Cascade" Induction Motors, 424
Sandycroft's Kapp Vibrator, 347
San Francisco Exhibition, 216
Sara Bridge—*see* Ganges Bridge
Schäffer and Budenberg's Precision Tachometer, 536
Schilowsky Gyroscopic Monorail System, 106
Schmidt Circulating System for Locomotive Superheater, 54
Sea Queen, Yacht's Tug and Water Boat, W. J. Yarwood and Sons, 13
Sebastian, Motor Tank Ship, Caledon Shipbuilding Company, 264, 268; (Letter), 463
Seidlitz, German Battle-cruiser, 1910–1911, 227 (*Four-page Supplement, February 27th*, 1914)
Sestri Ponente, Ansaldo's Works (xxiii-xxv, *Twenty-eight-page Supplement, May 8th*, 1914)
Shamrock IV., Camper and Nicholson, 601
Shanghai-Nanking Railway, 564
Shanks, T., and Co., Armour Plate Planing Machine, 710
Shanks' Electrically Driven Lathe, 178
Shuman's Sun Power Plant at Cairo, 330
Siamese Tin Field, Dredger for, Lobnitz and Co., 186, 189 (*Two-page Supplement, February 13th*, 1914)
Siemens Brothers' Dynamos for 4000-Kilowatt Geared Turbo-generator, 432 (*Two-page Supplement, April 17th*, 1914)
Siemens Brothers' Electrical Equipment for Driving Large Machine Tools, 342
Siemens' Electrical Installation of Clocks and Automatic Telephones at King's College Hospital, 243
Siemens-Martin Steel Furnaces at Ansaldo's Works (xv, xvii, xviii, *Twenty-eight-page Supplement and Two-page Supplement, May 8th*, 1914)
Simon, Henry, Limited, Free Swinging Plansifter, 301
Simplon Tunnel, The Second, 172
Sisson's Experimental Steam Engine, 714
Smith and Coventry's Motor-driven Boring Mill, 260
Smith and Coventry's Rail Planing Machine, 655
Smith, Percy W., on Compression Tests on Woods, 391
Somerset and Dorset Joint Railway Goods Locomotive, 448, 456
South Alberta, Irrigation of, 170, 182

ELECTRICAL MATTERS:

Admil Electric Company's Equipment for Large Machine Tool Driving, 341
Ansaldo's Works, Electrical Manufacturing Department (xv, xvi, *Twenty-eight-page Supplement, May 8th*, 1914)
Application of Electrical Driving to Existing Rolling Mills, L. Rothera, 493
Archdale Radial Drilling Machine with Vickers Motor Drive, 406
Armour Plate Grinder and Armour Plate Planing Machine with Vickers Motor Drive, 284, 406
Asquith's Drills with Various Electric Drives, 284, 292
Automatic Starters for Heavy Machine Tools, Laurence, Scott and Co., 147
Boring Mills, Motor-driven, 158, 260, 273, 274, 284, 292
British Thomson-Houston Motors for Driving in Workshops, 97, 117, 261, 262, 285, 341, 424, 451
"Cascade" Induction Motors, Sandycroft, Limited, 424
Claydon Cement Works, Electrical Equipment, 312
Control Alarm for Marine Engines, T. H. Hill, 134
Controller, Carbon Contact, for Motor-driven Lathes, Laurence, Scott and Co., 178
Drilling Machines, Grinding and Polishing Machines, Motor-driven, Witton-Kramer, 506, 507
Drills, Portable, Motor-driven, J. H. Holmes and Co., 507
Dynamos for 4000-Kilowatt Geared Turbo-generator, Siemens Brothers, 432 (*Two-page Supplement, April 17th*, 1914)
Electric and Ordnance Accessories Company's Equipment for Machine Tool Driving, 406
Electric Pulley Block, Vaughan and Son, Limited, 435
Girod Electric Furnaces at Ansaldo's Works (xvii, xviii, xxiii, *Twenty-eight-page Supplement, May 8th*, 1914)
Görges Motor Connections, 424
Heavy Switchgear, A Reyrolle and Co., 218
Hydro-electric Engineering in Peru, W. T. Taylor, 68, 72
Induction Motors for Machine Tool Driving, British Thomson-Houston Company, Power Plant Company, 451
Ingot Slicer with Vickers Motor, 406
Lancashire Dynamo and Motor Company's System of Large Machine Tool Driving, 341
Lathe, with Variable-speed Motor, Cunliffe and Croom, 284, 292
Laurence-Scott Motors for Machine Tool Driving, 147, 178, 179, 285
Locomotives—*see* Locomotives
"Lux" Storage Cell for Train Lighting, Chloride Electrical Storage Company, 320; (Correction), 362
Machine Tool Driving—*see* Machine Tools, *and also* Workshops
Mississippi, 300,000 Hydro-electric Plant on the, 475, 502, 510, 530, 531
Petrol-electric Lighting Set, Record Engineering Company, 130; (Letters), 161, 180
Planing Machine with B.T.H. Motor and "Fabroil" Pinion, Powell, 285
Planing Machines, Various, with Vickers Motors, Craven Brothers, 284, 406

ELECTRICAL MATTERS (*continued*):

Polyphase Commutator Motor, H. W. Butler and Co., 424, 426
Push Button Control System, Igranic Electric Company, 163
Push Button Controller, British Thomson-Houston Company, 179
Railways—*see* Railways
Rotary Planing Machine with Westinghouse Polyphase Motor, 425, 426
Screwing Machine, Six-spindle, with Westinghouse Slip Ring Motor, 425, 426
Screwing Machines for Direct Electrical Drive, Joshua Heap and Co., 425, 426
Sewage Filter Beds, Electric Control Gear for, Igranic Electric Company, 646
Ships—*see* Ships
Siemens Brothers' Equipment for Driving Large Machine Tools, 342
Split Phase System, E. F. W. Alexanderson, 570, 613
Switch Panels and Starters, Igranic Electric Company, 260
Transporting Mails by Electric Induction, 154, 162
Turbo-generator, 25,000-Kilowatt, for Chicago, C. A. Parsons and Co., 9
Upper Rhine Railway Equipments, Connections, &c., 555, 568
Valparaiso Power Station, Gas Producer Plant, 399, 402
Workshops, Electric Driving in, 96, 117, 146, 178, 201, 260, 284, 292, 340, 406, 424, 451, 506

ENGINES AND MOTORS:

Central Exhaust Steam Engine, Hick, Hargreaves and Co., Limited, 547
Combined Superheater Engines and Boilers for Cement Works near Ipswich, R. Garrett and Sons, Limited, 310, 322 (*Two-page Supplement, March 20th*, 1914)
Diesel Engine, Small, Results of Trials, Professor W. E. Dalby, 395, 464; (Letter), 521
Diesel Engines at Ansaldo's Works (v, vi, *Twenty-eight-page Supplement, May 8th*, 1914)
Diesel Engines of the Fionia, Burmeister and Wain, 50
Diesel Engines, High-power, for Marine Service, J. Richardson, 652, 659; (Letter), 713
Diesel Engines for Marine Purposes, Present Position of, J. T. Milton, 395, 437
Djinn Marine Engine, 160 H.P., with Pumps, Compressors and Motor Winch, 317
Experimental Steam Engine for Port Arthur, 479
Experimental Steam Engine, W. Sisson and Co., 714
Four-cylinder Monobloc Engines, W. H. Dorman and Co., Limited, 318, 319
Four-cylinder Paraffin Marine Engine, J. I. Thornycroft and Co., 343, 346
Four-cylinder Paraffin Marine Motor, Dixon Brothers and Hutchinson, 345
Gas Engines and Alternators at Accrington, 6 (*Supplement, January 2nd*, 1914)
Gas Engines and Producers at Valparaiso, Ruston, Proctor and Co., 399, 402
Gleniffer Paraffin Marine Motor, 343
Hot Bulb Engine, Mitcham Motor Company, 682
Internal Combustion Engines, Commercial Tests of, W. A. Tookey, 104, 134
Kromhout Hot Plate Engine, Perman and Co., 318
Lifeboat Engine, 40 H.P., J. Tylor and Sons, 344
Marine Engine, 20 H.P., Austin Motor Company, 345
Marine Engines, Control Alarm for, T. H. Hill, 134
Marine Type Engines, J. Brooke and Co., 317, 319
Mill Engines, Breakdowns of, Michael Longridge, 188
Motor Tank Ship Sebastian's Engines, A. B. Diesels Motorer, 264, 268
Paraffin Engines of the Train Ferry Bridgit, Union Gas Engine Company, 494
Paraffin Marine Engines, Parsons Motor Company, 344
Petrol Engine for Lighting Set, Record Engineering Company, Limited, 130; (Letters), 161, 180
Quadruple-expansion Engines of the P. and O. Steamship Khiva, 79, 366, 376 (*Two-page Supplement, April 3rd*, 1914)
Self-starter for Large Marine Motors, Ailsa Craig Company, 345
Small Marine Engines, Boulton and Paul, 318
Suction Gas Engine, 200 H.P., for Tin Dredger, Tangyes Limited, 186, 189 (*Two-page Supplement, February 13th*, 1914)

EXHIBITION, Aero and Marine, 317
Exhibition, Commercial Motor Vehicle, 150, 176
Exhibition, Mining, at Manchester, 681, 698
Exhibition, San Francisco, 216
Explosion Gas Turbine, Theory of the, T. B. Morley, 337

F

FACTORY, Chocolate, near Bristol, Carsons, Limited, 35; (Correction), 67
Feed-water Diffuser, The "C. K.," Holdsworth and Sons, 630
Ferry, Motor-driven Train, Bridgit, for San Francisco, 494
Fighting Biplane, Vickers Limited, 350, 355
Fitting-out Yard, Genoa Harbour, Gio. Ansaldo e Co. (xxv–xxvii, *Twenty-eight-page Supplement, May 8th*, 1914)
Flying Boat, Perry, Beadle and Co., 350, 354
Flying Machine from an Engineering Standpoint, F. W. Lanchester, 516, 548
Forced Draught, Turbo-Fan for, Yarrow-Terry, 207; (Correction), 304
Foundries, Iron and Steel, at Ansaldo's Works (xv–xviii, *Twenty-eight-page Supplement, May 8th*, 1914)
Freeboard by Formula, A. A. Liddell, 279
Friction Drop Stamps, B. and S. Massey, 658
Furnaces, Forging and Annealing, Bonecourt Surface Combustion, 526

G

GAS Engines—*see also* Engines
Gas Engines and Alternators at Accrington, 6 (*Supplement, January 2nd*, 1914)

Four-cylinder Compound, Paris-Lyons-Mediterranean Railway, 19 (*Supplement, January 2nd*, 1914)
Four-cylinder Non-compound Passenger, Sir Gilbert Claughton, London and North-Western Railway, 18, 148, 149, 185; (Letters), 245, 259 (*Supplement, January 2nd*, 1914)
Goods, Somerset and Dorset Joint Railway, 448, 456
London and South-Western Railway, Mixed Traffic, and Tender, 18, 105, 534, 535 (*Two-page Supplement, May 15th*, 1914)
Lubricator, Mechanical, C. C. Wakefield and Co., 712
Mogul Express Goods, London, Brighton and South Coast Railway, 18, 120, 126; (Correction), 153 (*Two-page Coloured Supplement, January 30th*, 1914)
Six-coupled Express Superheater, Great Central Railway, 18 (*Supplement, January 2nd*, 1914)
Six-coupled Tank, London, Tilbury and Southend (Midland) Railway, 19 (*Supplement, January 2nd*, 1914)
Sulzer Diesel, 19 (*Supplement, January 2nd*, 1914)
Superheater, Schmidt Circulating System, 54
Wheel Quartering Machine, Motor-driven, Cunliffe and Croom, 262
Locomotives, Electric for the Butte, Anaconda and Pacific Railway, 445
Mineral Tank, with Mestre Superheater, Chemin de fer de l'Est, 518, 519
Single-phase, for the Rhætian Railway, A.E.G. Company, 246
Superheating Steam in, Henry Fowler, 66, 95, 127; (Letter), 161
Log Band Saw Mill, T. Robinson and Son, Limited, 381
Lubricator, Mechanical Locomotive, C. C. Wakefield and Co., 712

M

MACHINE TOOLS:

Adzing and Boring Machine for Railway Sleepers, T. Robinson and Son, Limited, 296
Archdale Radial Drilling Machine with Vickers Motor, 406
Armour Plate Grinder and Armour Plate Planing Machines with Vickers Motor Drive, 284, 406
Armour Plate Planing Machine, T. Shanks and Co., 710
Automatic Starters for Heavy Machine Tools, Laurence, Scott and Co., 147
Bar-cutting Machine with British Thomson-Houston Motor, 117
Boring Mill with Motor Drive and Starter, J. Stirk and Sons, 284, 292
Boring Mills, Motor-driven, Kearns, Smith and Coventry, Webster and Bennett, 260, 284, 292
Boring, Tapping, Studding and Milling Machine, G. and A. Harvey, Limited, 514, 515
Boring and Turning Mill, King Machine Tool Company, 158
Boring and Turning Mill, Vertical, J. Butler and Co., 273, 274; (Correction), 300
Cameron Shearing Machine and Craig and Donald Beam Bender, with Laurence, Scott and Co.'s Motors, 146
Drilling Machine, Vertical, W. Asquith, Limited, 620
Drilling Machines, Grinding and Polishing Machines, Witton-Kramer Electric Tool and Hoist Company, 506, 507
Drills, Portable, Motor-driven, J. H. Holmes and Co., 507
Drills, Various Motor-driven, William Asquith and Co., 284, 292
Electric Driving of Machine Tools—*see also* Workshops
Grinding Machine, Heavy Plain, Churchill Machine Tool Company, 298
Gun-boring Lathe and Locomotive Wheel Lathe, G. and A. Harvey, with Power Plant Company's Electrical Gears, 452
Hammer, Electric Pneumatic, S. Wolf and Co., 358
Hammer, Electro-pneumatic, with Mather and Platt Motor, 117
Ingot Slicer, with Vickers Motor, 406
Lathe, Converted, A. H. Maltman, 201, 203
Lathe Cutting-off Tool, The Eldick, Motogear Engineering Company, 630
Lathe, High-speed Combination Turret, H. W. Ward and Co., Limited, 461
Lathe, Motor-driven with Laurence-Scott Controller, Thomas Shanks and Co., 178
Lathe, with Variable Speed Motor, Cunliffe and Croom, 284, 292
Lathe, Vertical Turret, Motor-driven, Bullard, and British Thomson-Houston Company, 261, 262
Locomotive Wheel Quartering Machine, Driven by Two Motors, Cunliffe and Croom, 262
Machine, Motor-driven, for Grinding Calender Bowls, Mather and Platt, 96
Machine Tools, Motor-driven, Various, Alfred Herbert, Limited, 201
Mild Steel Milling Cutters at Sampierdarena Works (ii, iii, *Twenty-eight-page Supplement, May 8th*, 1914)
Neasden Works, Tools Driven by British Thomson-Houston Company's Induction Motors, 451
Pipe Flange Drilling Machine, Portable, G. and A. Harvey, Limited, 435
Planers, with Mather and Platt Motors, 146
Planing Machine with B.T.H. Motor and "Fabroil" Pinion, Powell, 285
Planing Machine, 20ft., Loudon Brothers, Limited, 436
Planing Machines, with Vickers Drive, 406
Polishing Shop, with Motor-driven Tools, 452
Power Hack Saw, with Induction Motor Drive, Wicksteed, 452
Punching, Angle-cutting and Bending Machine, Combined, F. Berry and Sons, 591
Radial Drill, with Induction Motor Drive, George Swift, 451
Radial Drill, with Mather and Platt Motor, 146
Radial Planing Machine for Armour Plate with Vickers Motor, Craven Brothers, 284
Rail-planing Machine, 17ft., Smith and Coventry, 655
Rotary Planing Machine, with Westinghouse Polyphase Motor, 425, 426
Sampierdarena Works, Machine Tools and Shops (ii–vi, *Twenty-eight-page Supplement, May 8th*, 1914)
Screwing Machine, Six-spindle, with Westinghouse Slip Ring Motor, 425, 426
Screwing Machines for Direct Electrical Drive, Joshua Hear and Co., 425, 426
Stirk Lathes with Motors by Electromotors, Limited, 117
Turret Lathe, with Geared Motor, Pollock and McNab and Electromotors, Limited, 201, 204
Vertical Boring, Turning, and Drilling Machine, Geo. Richards and Co., 658

SHIPS AND SHIPBUILDING:

General:

Launching System at Sestri Ponente, Ansaldo's Works (xxiii, xxv, *Twenty-eight-page Supplement, May 8th*, 1914)
Some Questions Relating to Battleship Design, T. G. Owens, 373, 384, 410
Unsinkable Ship, G. W. Dickie, 163
Warship Construction in 1913, 10, 147, 204; (Correction), 133
Warships and their Equipment at Ansaldo's Works (vi, vii, xvii, xxv, xxvi, xxvii, *Twenty-eight-page Supplement, and Three Two-page Supplements, May 8th*, 1914)

British Navy:

Iron Duke, H.M. Battleship, 10 (*Supplement, January 2nd*, 1914)
Laverock, H.M. Torpedo-boat Destroyer, Aground, 286

Foreign Navies:

French Battleship Courbet, 18 (*Supplement, January 2nd*, 1914)
French Destroyers Bisson and Renaudin, 615
German Battleship Kaiser (*Supplement, January 2nd*, 1914)
German Dreadnought Kronprinz, 329
German Warship Design, Modern, 227 (*Four-page Supplement, February 27th*, 1914)
Italian Battleship Giulio Cesare (vi, xvi, *Twenty-eight-page Supplement, and Two-page Supplement, May 8th*, 1914)
Italian Submarine Salvage Vessel Anteo, Werf Gusto (A. F. Smulders), 208, 210
Neptune, United States Naval Collier, Control of Turbines from the Navigating Bridge, 573

Miscellaneous:

Aerial Screw Tug, James Pollock, Sons and Co., Limited, 508
Aquitania, The Cunard Liner, 21, 587, 622, 630 (*Supplement, January 2nd*, 1914)

Miscellaneous (*continued*):

Arum, Motor Ship, Swan, Hunter and Wigham Richardson, 598, 683, 684
Cairnross, Geared Turbine Cargo Steamer, 21 (*Supplement, January 2nd*, 1914)
California, Motor Ship (*Supplement, January 2nd*, 1914)
Cap Trafalgar, South American Liner, 312
Crusader, with 300 H.P. Brooke Engine, 317, 319
Datetree, Self-trimming Collier, 626
Emanuel Nobel, Motor Ship (*Supplement, January 2nd*, 1914)
Fionia, Diesel Engine Ship, Burmeister and Wain, 50
Hagen, Motor Oil Tank Ship (*Supplement, January 2nd*, 1914)
Imperator, Hamburg-America Liner, 21 (*Supplement, January 2nd*, 1914)
Jules Henry Converted from Sailing to Motor Ship, 400; (Letter), 463
King Orry, Geared Turbine Channel Steamer, 21 (*Supplement, January 2nd*, 1914)
Lifeboats, Motor, for Atlantic Liners, MacLaren Brothers, 460
Peninsular and Oriental Liner Khiva, 79, 366, 376 (*Two-page Supplement, April 3rd*, 1914)
Sea Queen, Yacht's Tug and Water Boat, W. J. Yarwood and Sons, 13
Sebastian, Motor Tank Ship, Caledon Shipbuilding Company, 264, 268; (Letter), 463
Twin-screw Tug and Salvage Steamer, Dunedin, Stevenson and Cook, 217
Tynemount, Electric Motor Ship, 21, 22 (*Supplement, January 2nd*, 1914)
Typical Ships, 366, 376 (*Two-page Supplement, April 3rd*, 1914)
Vaterland, Hamburg-Amerika Liner, 572
White Star Liner Britannic, Harland and Wolff, Limited, 238, 240, 257

SHIPBUILDING Works at Esquimalt, Vancouver, Yarrow and Co., 132
Shipyard Extensions at Hebburn-on-Tyne, Hawthorn, Leslie and Co., 14
Shipyard at Sestri Ponente, Gio. Ansaldo e Co. (xxiii–xxv, *Twenty-eight-page Supplement, May 8th*, 1914)
Shrinking Furnace for Guns at Ansaldo's Works (x, *Twenty-eight-page Supplement, May 8th*, 1914)
Signalling School, Lancashire and Yorkshire Railway, at Manchester, 42, 46
Snow Plough, Rotary, for the Lötschberg Railway, Henschel and Son, 460
Spiral Gears, Mark Barr, 562

Armour Plate Planer—*see* Machine Tools
Armour Plate, 10in., for Spanish Battleship Jaime I., Sir W. G. Armstrong, Whitworth and Co., 320
Arnold, Professor J. O., and Professor A. A. Read, on Chemical and Mechanical Relations of Iron, Tungsten, and Carbon and of Iron, Nickel, and Carbon, 351, 356
Artesian Water Supply of Australia, 63
Asbestilite for Portable Buildings, Felber, Jucker and Co., 700

ASSOCIATIONS, INSTITUTIONS, AND SOCIETIES.

Association of Engineers, Manchester:
Dinner, Fifty-eighth Anniversary, 218
Education of Engineers, J. C. M. Garnett, 382
Mechanical Filtration, A. J. Clark, 262
Sources of Mechanical Energy, E. G. Hiller, 119
Sun-power Plant at Cairo, F. Shuman, 330
Transmission of Power by Chains, H. T. Hildage, 95

Association, Incorporated Municipal Electrical:
Annual Convention, 566, 672, 709
Annual Dinner and Visits, 673
Commercial Development of Electricity Supply in Moderate-sized Towns, W. A. Vignoles, 673
Design and Operation of Modern Boiler-house Plant, S. E. Fedden, 673, 709
Electric Vehicle Committee, 672
Presidential Address, R. A. Chattock, 672
Standardisation of Tariffs, J. H. Bowden, 710

Association, International Testing:
Organisation of British Section, 28

Institute of Chemistry:
Explosives, W. Macnab, 273

Institute, Concrete:
Forms for Concrete Work, Allan Graham, 327

Institute, Iron and Steel:
Annual Dinner, 531
Annual General Meeting, 504, 527
Autumn Meeting in Paris, Programme, 629
Awards, 559
Development of Dry Cleaning in Blast Furnace Gas Purification, F. Müller, 560; (Correction), 604
Failures of Heavy Boiler Shell Plates, Sidney A. Houghton, 540, 559, 577
Hardening, Contribution to the Theory of, A. McCance, 529
Hardening of Metals, with Special Reference to Iron and its Alloys, C. A. Edwards and Dr. H. C. H. Carpenter, 529
Magnetic and Mechanical Properties of Manganese Steel, Professor B. Hopkinson and Sir R. Hadfield, 528
Presidential Address, Adolphe Greiner, By-products of Iron and Steel Works, Recovery and Application, 504
Production of Steel Direct from Ore, E. Humbert and A. Hethey, 561
Recent Improvements in Case-hardening Practice, Henry S. Heathcote, 561
Talbot Process in Comparison with other Open-hearth Refining Processes, Dr. Friedrich Schuster, 527

Institute of Metals:
Annual Spring Meeting, 324, 342
Beilby Prize Committee's Report, Dr. C. H. Desch, 325
Bronze, John Dewrance, 342, 359
Effect of Vanadium in Brass Containing 50–60 per cent. of Copper, R. J. Dunn and O. F. Hudson, 342

Institute of Metals (*continued*):
Electrolytic Corrosion, The Effect of, on the *a*-brasses, Dr. Desch and Mr. S. Whyte, 343
Influence of Added Metal on some Copper-aluminium Alloys, Professor A. A. Read and Mr. R. H. Greaves, 342
Metals, Solidification of, from the Liquid State, Dr. C. H. Desch, 325
Muntz Metal, Dr. Stead and H. G. A. Stedman, 325
Presidential Address, Failure of Condenser Tubes, Engineer Vice-Admiral Sir H. Oram, 324, 331
Quantitative Effect of Rapid Cooling upon the Constitution of Binary Alloys, G. H. Gulliver, 343

Institution of Civil Engineers:
Comparative Economics of Tramways and Railless Electric Traction, T. G. Gribble, 360
Examinations, February, 1914, Pass List, 332
James Forrest Lecture, 1914, The Flying Machine from an Engineering Standpoint, F. W. Lanchester, 516
New Harbour Works and Dockyard at Gibraltar, Adam Scott, 191
Rail Corrugation and its Causes, S. P. W. Sellon, 248, 352
Rail Steels for Electric Railways, W. Willox, 248, 352
Some Recent Developments in Commercial Motor Vehicles, T. Clarkson, 360
Superheating Steam in Locomotives, Henry Fowler, 66, 95
Transportation Problem in Canada and Montreal Harbour, F. W. Cowie, 438

Institution of Electrical Engineers:
Train Lighting Systems, T. Ferguson, 220

Institution, Junior, of Engineers:
Continuous Feeding Elevators, T. C. Morewood, 120
High-power Diesel Engines for Marine Service, J. Richardson, 659

Institution of Mechanical Engineers:
Anniversary Dinner, 474
Annual General Meeting, 232
Application of Electrical Driving to Existing Rolling Mills, L. Rothera, 474, 493
Chemical and Mechanical Relations of Iron, Tungsten and Carbon, and of Iron, Nickel and Carbon, Professors J. O. Arnold and A. A. Read, 351, 356
Commercial Tests of Internal Combustion Engines, W. A. Tookey, 104, 134
Mechanical Engineering Aspects of Road Construction, Colonel R. E. B. Crompton, 55, 81, 109
Some Modern Methods of Welding, T. T. Heaton, 232, 247

GRADUATES' ASSOCIATION:
Breakdowns of Mill Engines, Michael Longridge, 183, 188

Institution of Naval Architects:
Award of Medal and Premiums: Memorial to Sir W. White; Elections, 371
Design of Steamships from the Owner's Point of View, L. Peskett, 397
Elasticity and Endurance of Steam Pipes, C. E. Stromeyer, 397, 403
Foster Strain Meter and some Data Obtained Therewith, W. R. G. Whiting, 397
Further Experiments upon Wake and Thrust Deduction, W. J. Luke, 374
Further Results of Research Work in connection with the Post Graduate Scholarship in Naval Architecture, A. Cannon, 399
Instrument for Measurement of Velocity of Roll, H. E. Wimperis, 399
Model Experiments on the Resistance of Mercantile Ship Forms, G. S. Baker, 374
Present Position of Diesel Engines for Marine Purposes, J. T. Milton, 395, 437
Presidential Address, Lord Bristol, 372
Safe Stability and Economical Use of Water Ballast in Ships, A. T. Wall, 398
Some Questions relating to Battleship Design, T. G. Owens, 373, 384, 410
Spring Meeting, 290, 371, 384, 395, 410, 603
Stability of Ships in Damaged Conditions, P. Y. Brimblecombe, 398

Institution of Naval Architects *(continued)*:
Summer Meeting and Programme, 657, 713
Suyehiro, Dr., Torsionmeter, 397
Trials made on a Small Diesel Engine with New Form of Optical Indicator, Professor W. E. Dalby, 395, 464
Use of Superheaters and Superheated Steam in Mercantile Steamers, Harry Gray, 396, 603

Institution of Naval Architects, German:
Experiments with Case-hardening, Professor R. Baumann, 613
Guns and Armour, Geh. Professor J. Rudloff, 612
Steam Shipping on Lake Constance, 641
Stuttgart Laboratories, 641
Summer Meeting, 612, 640
Tension and Alteration of Form in Riveting in Relation to Hole Cracks, Professor R. Baumann, 613
Zeppelin Airships, 640

Institution, North-East Coast, of Engineers and Shipbuilders:
Appeal for Endowment Fund, 306
Wireless Telegraphy, H. Fothergill, 628

Institution of Post-office Electrical Engineers:
Telephone Engineering Economics, Underground Pipes and Cables, Harvey Smith, 288

Institution, Royal:
Elections; Programme of Lectures, 409

Society of Chemical Industry, Manchester Section:
Power and Heat Costs in Chemical Works, T. R. Wollaston, 180

Society, Liverpool Engineering:
New Mersey Bar Lightship Alarm, Lieutenant J. W. Gracey, 357
Sewage Disposal Problem, Dr. G. Fowler, 272

Society, Royal:
Aerodynamic Balance, Cambridge Scientific Instrument Company, 541
Conversaziones, 541, 680
Coolidge X-ray Tube, 680

Society, Royal, of Arts:
Georgian Bay Ship Canal, Sir R. W. Perks, 148

ASSOUAN Dam, R. Holt, 631
Australia, Artesian Water Supply of, 63
Australian Notes, 482, 600
Automatic Coupling—*see* Railways
Automatic Drain Valve for Steam Cylinders, Sir W. H. Bailey and Co., Limited, 301
Automatic Telephones—*see* Telephones
Automatic Telpher, Bleichert's Aerial Transporters, 700

B

BAKER, G. S., on Model Experiments on the Resistance of Mercantile Ship Forms, 374
Barr, Mark, on Spiral Gears, 562
Barrage, The Hindia, on the Euphrates, 87, 100
Battleships—*see* Ships
Baumann, Professor R., on Experiments with Case-hardening, and on Tension and Alteration of Form in Riveting in relation to Hole Cracks, 613
Bearings, Ball and Roller, Hoffmann Manufacturing Company, Tormo Manufacturing Company, Skefko Ball Bearing Company, 383
Belts, Steel Driving, Eloesser System, Power Pulley Company, 245
Betulander Automatic Telephone System, 214
Biles, Professor Sir J. H., on Life-saving Appliances, 283
Biles, Professor Sir J. H., and Lord Pirrie, Reports to Dominions Royal Commission, 51, 74
Birthday Honours, 701
Blast Furnace Gas Purification, Dry Cleaning in, F. Müller, 560; (Correction), 604
Board of Trade Appointments, 220

BOILERS:
Boilers and Boiler Mountings at Manchester Mining Exhibition, 699
Boilers and Boiler Shops at Ansaldo's Works (iv, vi–viii, *Twenty-eight-page Supplement, May 8th*, 1914)
Boilers and Coal Handling Plant at Southend, British Niclausse Boiler Company, Limited, 542, 543
Boilers Fired with Coke Oven Gas, Ammonia Recovery Producer Gas, Blast Furnace Gas, and Liquid Fuel, Bonecourt Process, 525, 557, 585; (Letters), 601, 648, 685, 713
Britannic's Boilers, 241
Combined Cylindrical and Water-tube Boiler, T. Hudson, Limited, 488, 489
Design and Operation of Modern Boiler-house Plant, S. E. Fedden, 673, 709
Double and Single-ended Boilers of the P. and O. s.s. Khiva, 366, 376
Failures of Heavy Boiler Shell Plates, S. A. Houghton, 559, 577
Hand-fired Furnace and Chain Grate Stoker for Collieries, Ed. Bennis and Co., 699
Heat Analysis of an Oil-fired Water-tube Boiler, D. W. Rennie, 472, 499
Marine Type Water-tube Boiler, J. and A. Niclausse, 280; (Letters), 357, 463 (*Two-page Supplement, March 13th*, 1914)
Mercury Boiler with Steam Generating Apparatus for Power Production, W. L. R. Emmet, 697

BOMBAY, New Docks at, 353
Bonecourt Surface Combustion Process, 525, 557, 585; (Letters), 601, 648, 685, 713

DOCKYARD NOTES:
American Submarines, "Holland" Type, Sixteen in Course of Building, 133
American Warships' Size Limited by the Panama Canal, 79
Argentine Battleships Rivadavia and Moreno, 216
Australian Navy's First Submarine A E 1, 133
Austrian Destroyers of the "Tatra" Class, 356
Austrian Dreadnoughts, New, Progress, 645
Austria-Hungary, New Colour for Large Ships, 491
Austria's Naval Additions and Renovations, 286
Austro-Hungarian Battleship of the Habsburg Class, Reconstruction, 133
Austro-Hungarian Battleship Svent Istvan Launched, 179
Austro-Hungarian Light Cruisers Szigetvar, Aspern, and Zenta, Reconstruction, 561
Austro-Hungarian Minelayer and Naval Colliers, 179
Austro-Hungarian Scout Cruisers Helgoland and Novara, 286
Austro-Hungarian Scout Cruiser Saida, 561
Austro-Hungarian Submarines Built in Germany, 133
Austro-Hungarian Torpedo Boats under Construction at Fiume, 179
Battleships, Names, H.M., Four New, 645
Battleships, H.M., New, Laid Down, 52
Boiler Explosion, Fatal, on H.M. Destroyer Albacore, 405
Brazilian Battleship to be Built by Sir W. G. Armstrong, Whitworth and Co., 216
Brazilian Government's Sale of Armoured Monitors now under Construction, 491
Canadian Customs Cruiser Margaret Launched, J. I. Thornycroft and Co., 133
Canadian Oil Supply Regulation, 133
Chilian Ocean-going Destroyers, 79
Chinese New Scout Cruisers, Dimensions and Equipment, 491
Cleopatra, H. M. New Light Cruiser, 179, 286
Coaling Averages at Malta, 561
Danish Submarines Neptune and Galatea, 286
Destroyers, H.M. "L" Type, 405
Destroyers, H.M. New, as Flotilla Leaders, 356
Engine-room Artificers in the Royal Navy, Grievances, 133
Föttinger Transformers for Chinese, German and Japanese War Vessels, 405
French Battleships, New, Names and Armament, 216
French Destroyer Magon, Trials, 645
French Dreadnoughts, Boilers, 491
French Navy, New Cruisers' Design Criticised, 216
French New Battleships of the "Tourville" Class, 491
French Projected "Mother Ships" and Ten Scouts, 491
French Submarines Nereide and Gustave-Zédé, 561
French Submarines, Six under Construction, 356
Garland, H.M. Destroyer, 52
German Battleship Ersatz Brandenburg, 179
German Cruisers Ersatz Irene and Ersatz Prinzess Wilhelm to Replace Old Ships, 491
German Cruisers Irene and Prinzess Wilhelm Struck Off Effective List, 491
German Cruisers Karlsruhe, Rostock, &c., Equipment and Trials, 561
German Destroyer V 25, 356
German Gunboat C, 405
German Ship Nomenclature, Confusing System, 405
Grecian 125-Ton Torpedo Boats Built in Germany, Names, 179
Greek Battleship Salamis, Armament of, 356
Indefatigable, H.M.S., to be Broken up, 79
Invincible, H.M.S., Turrets Altered from Electrical to Hydraulic Fittings, 216
Italian Armoured Cruiser San Giorgio, 52
Italian Battleship Giulio Cesare, Trials, 179, 216
Italian Battleships, Speed and Armament, 216
Italian Destroyers Audace and Animoso, 216
Italian Dreadnought Diulio, Trials, 508
Japanese Armoured Cruisers Kirishima and Haruna, Launched, 52
Japanese Battleship Fuso's Armament, 405
Laertes, H.M. Destroyer, 52
Landrail, Late Hotspur, H.M. Torpedo-boat Destroyer, Launched, 179, 684
Laurel, H.M. Destroyer, J. S. White and Co., 133
Liberty, H.M. Auxiliary Ship, to be Re-named Wanderer, 52
Liberty and Meteor, H.M. Destroyers, 52
Linnet, H.M. Destroyer, "L" Class, 52

DOCKYARD NOTES *(continued)*:
Lookout, H.M. Ocean-going Destroyer, Launched by J. I. Thornycroft and Co., 491
Lowestoft, H.M. Light Cruiser, 95
Marlborough, H.M. Battleship, 179, 645
Miranda, H.M. Destroyer, 684
New Zealand, H.M. Battle-cruiser, 179
Northampton, H.M.S., Late Sharpshooter, for Training Purposes, 356
Nottingham, H.M. Armoured Cruiser, 286
Obsolete Warships, Sale and Prices, 645
Oil Station for the Admiralty on the Firth of Forth, 52
Roumania's New Destroyers, Particulars of Design and Armament, 179
Roumania's Two Cruisers Building in Germany, 286
Royal Oak, H.M. Battleship, Offered for Sale, 79
Royal Oak and Royal Sovereign, H.M.S., Laid Down, 79
Royal Sovereign, H.M. Battleship, Particulars of Construction, 79
Russian Artillery Works Company on the Volga, Vickers Limited, 356
Russian Building Programme, 286
Russian Four Battle Cruisers of the Navarin Type to be Largest Warships in the World, Armament, Displacement, &c., 491
Russian Protected Cruisers Admiral Spiridof and Admiral Bontakoff, 133
Sale of Old Battleships, Cruisers, &c., 52, 179

Books Received (*continued*):
Paint and Painting, Commercial, A. S. Jennings, 653
Panama Canal, C. R. Enock, Nation's Library, 295
Panama Canal, The Story of the, Logan Marshall, 295
Photo Electricity, Dr. H. Stanley Allen, 49
Physics, A. Text-book on (Electricity and Magnetism), J. H. Poynting and Sir J. J. Thomson, 571
Plate Girders, Design of, Lewis E. Moore, 213
Power and Power Transmission, E. W. Kerr, 513
Powers and Aeronautics, 241
Practical Railway Spiral, L. C. Jordan, 241
Principles of Flight, A. E. Berriman, 314
Principles of Industrial Organisation, D. S. Kimball, 157
Railroad Surveying, Text-book on, G. W. Pickels and C. C. Wiley, 571
Railway Operating Statistics, Elements of, C. Travis, D. R. Lamb and J. A. Jenkinson, 295
Railways of Great Britain, Lord Monkswell, 103
Railways of the World, E. Protheroe, 513
Rating of Machinery, Some Facts and Fallacies, G. Humphreys-Davies, 710
Rays of Positive Electricity and their Application to Chemical Analyses, Sir J. J. Thomson, 295
School Statics, G. W. Brewster and C. J. L. Wagstaff, 295
Science and Industry, Co-operation of, S. Illingworth, 513
Screw Cutting for Engineers, Ernest Pull, 213
Sewage Drainage Systems, Isaac Shone, 295
Shop Sketching, J. W. Woolley and R. B. Meredith, 295
Simplified Formulas and Tables for Floors, Joists and Beams, Roofs, Rafters and Purlins, N. C. Ricker, 129
Slide Rule Notes, H. C. Dunlop and C. S. Jackson, 295
Smithsonian Institution, United States National Museum, Report, 49
Social Guide, 1914, Mrs. H. Adams and E. A. Browne, 710
Soft Soldering, Hard Soldering and Brazing, J. F. Hobart, 241
Solution of Railroad Problems by the Slide Rule, E. R. Cary, 241
Some Famous Buildings and their Story, A. W. Clapham and W. H. Godfrey, 571
South Wales Coal and Iron Companies, 1914, 653
Specification Writing, Elements of, R. S. Kirby, 14
Staffordshire County Council: Annual Report of the Medical Officer of Health, G. Reid, M.D., for 1912, 129
Steam Boiler, Arithmetic of the, C. J. Mason, 314
Steam Engine, Handbook on the, H. Haeder, 571
Steam Turbines, J. A. Moyer, 571
Steel Analysis, A Modern, J. A. Pickard, 487
Steel Foundry, J. H. Hall, 597
Subaqueous Foundations, Practical Treatise on, &c., C. E. Fowler, 710
Suspension Bridges, Arch Ribs, and Cantilevers, W. H. Burr, 487
Technical Words and Phrases: An English–German and German–English Dictionary, C. A. Thimm and W. von Knoblaugh, 513
Telegraphy, Sir W. H. Preece and Sir J. Sivewright, 597
"Transactions" of the Institution of Naval Architects, 1913, Part II., R. W. Dana, 295
Transmission Line Formulas for Electrical Engineers and Engineering Students, H. B. Dwight, 241
Twentieth Century Inventions, C. R. Gibson, Nation's Library, 295
Village Electrical Installations, W. T. Wardale, 241
War Traders, G. H. Perris, 710
Water: Its Purification and its Use in the Industries, W. W. Christie, 241
Water Supply, Studies in, A. C. Houston, 314
Waterworks Engineering, F. C. Uren, 710
Well Sinking, Practical, B. A. Harrison, 710
Wireless Telegraphists, Handbook of Technical Instruction for, I. C. Hawkhead, 129
Wireless Telegraphy, Handbook of, J. E. Murray, 314
Wireless Telegraphy, W. H. Marchant, 314
Wireless Telegraphy and Telephony, Yearbook, 597
Working Drawings of Machinery, W. H. James and M. C. Mackenzie, 513
Workmen's Compensation Cases, Vol. VI., Judge Ruegg and Douglas Knocker, 314
Workshop Practice, Modern, Ernest Pull, 625

HAMEL, Gustav, 611

I

INDIA and Ceylon, Communication between, 253
International Shipping Conference, 610
Italian Air Fleet, 141
Italian Railways, Fresh Agitation on, 471

L

LEIPZIG–BERLIN Canal Project, 142
Locomotive Cab Signals, 1
London's Electricity Supply, 471
London Traffic, Report on, 142

M

MANCHESTER Engineers, Meeting House for, 366
Manchester Ship Canal, 253
Mersey, Proposed Tunnel under the, 143
Metropolitan Water Board, New Offices for the, 2
Motor Boats at Monaco, 471
Motor Vehicles for War Purposes, 610
Municipal Trading in Vienna, 611

N

NAVY Estimates, 365
North Atlantic "Pool," 142

O

OBSTREPOROUS Vessel, 141
Oil Fuel for the Navy, 609
Old Age Pension Difficulties, 254

P

PARIS Sewage, 141
Paris Water Supply, 1, 366
Passenger Transport in Cities, 366
Protection of Inventors, 253

R

RAILWAYS in the Sahara, 610
Royal Commission on Railways, 253

S

SAFETY of Life at Sea, 142
Senghenydd Report, 472
Sewage Works at Harpenden, 365
Smoke, 609
Southport and the Sea, 1
State Railways, 141
State Working of Railways, 141, 609
Stone Dust Remedy, 141
Subway under Cannon-street, New, 2

U

UNDERGROUND Railway for Milan, 1

W

WAGONS, Total Adherence, 472
Weights and Measures, French Reforms, 365
Welsh Railway Strike, 2
Wireless Firing of Mines, 609

Y

YARROW'S Shipyard on the Pacific, 142
Yorkshire Coal Strike, 471

Paragraphs.

A

ACCIDENTS in Mills and Factories in Washington State; Safety Committees of Workmen, 321
Acoustical Apparatus for Determination of Density of Liquids and Gases, 263
Acetylene Safety Lamp Competition, 483
Aerial Propulsion of Canal Barges, L. Blin Desbleds, 28
Aerial Railway for Ore Transport from Algerian Mine to Steamer, 263
Aerial Ropeways in India, Great Advantages of, 321
Aerially Propelled Steel Tug, 375

AERONAUTICS:
Accidents to Aviators, 321
Aerial Derby Entries, 537
Aeroplane Deterioration, Lieut.-Col. F. H. Sykes, 705
Aeroplane Experiments for Military Purposes; Practice in Photography, 509
Aeroplane, Invisible yet Fireproof, 537
Aeroplane Motor Competition in Germany, 349
Aeroplanes and Grenades, Experiments by the Royal Flying Corps, 677
Airship Motors, Device for Muffling Sound, 375
American Navy, Development of Aviation, 153
Flying Corps, Royal, and T.B.E2 Type Machines, 401
Flying over Houses, Complaints of Noise and Danger, 209
Forlanini Airships Ordered in Milan by British Admiralty, 99
Giant Aeroplane for Russian Navy, 291
Hamel, Gustav, Admiralty Recognition of his Services, 593
Height Flying Record in Italy, 263
Landing Stages for Aeroplanes, 321
Looping the Loop by Government Aeroplane Pilots, 483
Safety Belt Needed and Prize Offered, 705
Seaplanes, Seven, New Type for the Admiralty, 592
Strength of Construction in Aeroplanes, War-office Report, 593
Waterplane No. 110, Fall into the Sea, 375
Zeppelin Destruction as an Everyday Occurrence, 677

AGRICULTURAL Motors for the West Indies, 125
Air Filter, New Form of, 209
Alps in South-East France, Survey, 321
Aluminium, Its Future in India, 237
Aluminium for Motor Vehicle Fittings, Advantages and Defects, 349
Aluminium, Process for Nickel Plating, 153
Analysis of Substances Precipitated from Liquids, 567
Anderson, A. Bruce, Lost in the Empress of Ireland, Resolution at Extraordinary Meeting, 649
Antarctic Expedition in 1915, Swedish, to be Absent for Five Years, 125
Anti-corrosion Mixture, Red Lead and Litharge, H. A. Gardner, 375
Antwerp Shipbuilding Yards, Record Output, 677
Ashokan Aqueduct for New York Water Supply, 181

ASSOCIATIONS, INSTITUTIONS & SOCIETIES:
Association of Consulting Engineers:
Annual General Meeting, 536
First Public Dinner, 162

Association of Engineers, Manchester:
Visit to Rolls-Royce Works, 566

Association, Incorporated Municipal Electrical:
Nineteenth Annual Convention at Birmingham, Programme, 389

Association of Mechanical Engineers, Birmingham:
Fundamental Principles of Electric Telpherage, Professor G. Kapp, 321

Institute of Chemistry:
Thirty-sixth Annual General Meeting, 276

Institute, Iron and Steel:
Annual Meeting and Award of Bessemer Gold Medal, 191
Programme of Papers at the Annual Meeting, 440

Institute of Marine Engineers:
Lloyd's Register Scholarships, 224

Institute of Metals:
Annual Meeting and Programme, 222
Autumn Conference at Portsmouth, 692
Internal Strains in Cold Wrought Metals, &c., Professor E. Heyn, 441
May Lecture, Professor E. Heyn, 551

Institute, The Royal Sanitary:
Congress in Blackpool, 688
Lectures and Demonstrations, Programme 82

Institution of Automobile Engineers:
Some Experiments and their Bearing on the Design of Automobile Parts, Dr. A. M. Low, 662
Visit to Belgium, 690

Institution of Civil Engineers:
Award for Papers Read, 1913-1914, 497

Manchester Students:
Annual Dinner, 299

Students' Meetings:
Air Filtration and the Cooling and Ventilating of Electrical Machines, W. E. Gurry, 28

ASSOCIATIONS, INSTITUTIONS, AND SOCIETIES *(continued)*:
Application of Power Railway Signalling in Great Britain, C. I. Routh, 84, 125
East Stirlingshire Waterworks: Earthen Embankments, Oswald I. Bell, 414

Institution of Gas Engineers:
Annual General Meeting in Liverpool, 620

Institution, Junior, of Engineers:
Annual Dinner; Sir Oliver Lodge and Sir B. Redwood on The Petroleum Industry, 263, 272
Annual Meeting and Report, 276
Modern Gearing, H. H. Thorne, 153, 209

Institution of Mechanical Engineers:
Journal, Publication of First Number, 677
Summer Meeting in Paris, 414

Institution of Mining and Metallurgy:
Annual Dinner, 316
Formation of Mineral Deposits, W. P. Dreaper, 321

Institution of Municipal and County Engineers:
Annual Conference, 114
Meeting and Excursions at Dunfermline, 607; Visit to Rosyth, 607
Syllabus of Examinations, 28

Institution of Naval Architects:
Annual Meetings and Dinner, Offer of Medal and Premium for Papers, 138
Summer Meeting in Newcastle, 517

Institution, North-East Coast, of Engineers and Shipbuilders:
Scholarship Offered, 133

Institution of Petroleum Technologists:
Council and Membership, 59

Institution of Railway Signal Engineers:
Annual Meeting, 301

Institution, Royal:
Annual Meeting and Report, 551
General Meetings and Elections, 166, 276, 648
Heat and Cold, Lectures by Professor C. F. Jenkin, 177

Institution of Water Engineers:
Annual Summer Meeting, 470, 578
Programme, 578

Society, The Aeronautical:
Gold Medal Award, 710

Society of Engineers (Incorporated):
Status Prize, 12

Society, The Liverpool Engineering:
Failures of Dams, J. R. Davidson, 207

Society, The Optical:
Annual Meeting; Death of Sir D. Gill, 208

Society, The Royal:
Protection from Lightning and Range of Protection Afforded by Lightning Rods, Sir J. Larmor and J. S. B. Larmor, 700
Type-reading Optophone, Sir O. Lodge, 649

Society, Royal Agricultural, of England:
Seventy-fifth Annual Exhibition, 167, 296
Trials for Agricultural Tractors and Ploughs, 349

Society, Royal, of Arts:
Albert Medal Awarded to Chevalier Marconi, 657
Duke of Norfolk Elected Vice-president, 409
Medal Awards, 719

Society, Royal Meteorological:
Annual Meeting; Gold Medal Award: Use of Kites in Meteorology, 124
Barometer Changes and Rainfall, A Statistical Study, E. H. Chapman, 690
Cuban Rain Record and its Application, A. Hampton Brown, 580
Interpretation of the Results of Soundings with Pilot Balloons, Dr. W. N. Shaw, 225
Pilot Balloon Ascents at Central Flying School, Upavon, during 1913, G. N. Dobson, 233
Rainfall in the Southern Pennines, B. C. Wallis, 690
Reduction of Barometer Readings in Absolute Units, &c., E. Gold, 580
Relation Between Wind Direction and Rainfall, H. J. Bartlett, 690
Report on Weather, Crops, &c., for 1913, J. E. Clark and R. H. Hooker, 468
Small Anemometer for Tropical Use, A. J. Bamford, 468

ATLANTIC Crossing by Aeroplane, Plans of French Society, 263
Atmospheric Pollution in Hull due to Smoke, 483
Automatic Motor Car Starters, Competition in Hungary, 401

B

BARBED Wire Connected with Electric Plant in Mexican Warfare, 677
Bells and Gargoyles, Ancient Traditions, 455
Belts, Leather or Rubber, for Motor Vehicles, 15
Belts on Pulleys, Portable and Fixed Appliances for Replacing from the Floor Level, 401
Benzol Recovery from Coal Used for Tar Distillation, 401
Birmingham Industries Depicted by Cinematograph, 705
Blue Print Reproduction by Oil Coating, 537
Boiler Explosions, 537
Boiler Stop Valve Chest Explosion at Pinkston Tramway Power Station, Glasgow, 537
Boilers, Water-tube, Cause of Tube Failures, 455
Boulton and Paul, Dinner to Workpeople, 138
Bridge Across the Hudson River, 400
Briquetting by Pressure in the Presence of Steam, 483

C

CABLEWAY to the Vale of Kashmir, 45
Cactus Plant Bark, Resin Extraction from, 427
Calorimeters, Flow, Investigation to Determine Heating Value of Gases, 546
Canal Opened by German Emperor, 677
Catalysis, Professor Paul Sabatier, 705
Celluloid Articles, Regulations for Storage, 567
Cement Consumption in Argentina for Irrigation Works, 401
Cement, Substitute for, in Turkey, 705
Cement Wash on Concrete, 593
Chains for Lock-gate Protection of the Panama Canal, 483
Channel Tunnel, Lecture by M. Moutier, 181
Charcoal Burning in the Weald, 509
Chartered Institute of Patent Agents, Dinner, 497
Chemicals for Fertilising Purposes in Germany, Demand in Excess of the Supply, 181
Chinese the Best of Oriental Workmen, 291
Circulating Water in Petrol Engines, Interesting Application of Electric Heaters to Prevent Freezing, 375
City and Guilds (Engineering) College Engineering Society, Reinforced Concrete, C. N. Ryan, 28
City and Guilds of London Institute, Change of Address, 113
Clay Purification by Electrical Method, Count Schwerin, 483
Clock to Register Time in Different Parts of the World, 427
Coal and Briquettes in Great Britain, France and Germany, 15
Coal Consumption in Germany, Official Statistics, 153
Coal Disaster Prevention, Proposed Government Measures, 537
Coal Dust Projected Against an Insulated Conductor as a Cause of Mine Explosions, 649
Coal Mining and Consumption in the United Kingdom, E. C. Hillier, 291
Coal and Other Minerals in the United Kingdom, Output and Number of Employés, 455
Coke Oven Gas in Open-hearth Furnaces, Patent in Connection with, T. S. Blair, 99
Colliery Equipment, Practical Notes on, J. F. Aust, 125
Collieries and Home Secretary's Bill, Protest, 567
Colliery Explosions, Committee's Report and Home-office Announcement, 125
Competition, Essays on New Processes, Prizes Offered, 401
Compressor for German Coal Mining Industry, Largest Yet Adopted, 677
Concrete, Advantages over Ironwork as a Fire Resister, 705
Concrete Bridge in California, Great Height and Length, 99
Concrete Building Construction, Floors and Stairs, 125
Concrete Buoy at Kingston, Jamaica, 509; (Letter), 620
Concrete Dry Dock for Boston, 612
Concrete Hardening Material Containing Iron Dust, 99
Concrete Hardening Material, New Type, 321
Concrete Piers at Boston, Tests of Action of Frost and Sea Water, 321
Concrete, Reinforced, Telegraph Poles, Severe Test, 427
Concrete for Telegraph Poles, Superiority Established by Resistance to Blizzard, 657
Conservation of Energy and Robert Mayer, Dr. J. J. Weyrauch, 99
Conversion of Horse-drawn Steam Fire Engine into an Electric Engine, 45
Cooling of Buildings in Hot Dry Climates, 263
Copper, International Standard of Resistance for, 483
Cork, World's Supply, 125
Cowes Harbour Breakwater, Bill before House of Commons, 593
Crank Shaft Fracture, Faulty Structure, 567
Customs Classification in France, 415

D

DAMS, Failures of, J. R. Davidson, 207
Danger Signal for Prosy Speakers, 45
Danger Signals by Twinkling Lights for Motorists and Others, 125
Dee, The River, Improvement Scheme, 427
Diesel Engine for Driving Pump Used for Fen Drainage, 455
Drummond Brothers' Annual Dinner, 358
Dust-laying Preparation for Use in Mines, L. Ussher, 349

E

EAST London College Chemical Laboratories, 705

ELECTRICAL MATTERS:
Agriculture and Small Industries, Demonstration of the Applications of Electricity, 649
Arctic Regions, First Electrical Plant Installed at Point Hope, Windmill as Prime Mover, 125

ELECTRICAL MATTERS *(continued)*:
Barges, Electrically Worked, on the River Hudson, Economy in Operation, 649
Barmbeck Power Station as a Decorative Object, 375
Battery with New Control System, 483
Benzine from Coal Extracted by Electrical Process, 567
British Practice in the Construction of High-tension Overhead Transmission Lines, B. Welbourne, 99
Californian Transmission Scheme of 425 Miles, 283
Carbon Brush Tests, 71
Cast Iron and Steel in Sweden, Electric Production of, 82

Salvage of the Submarine A 7, Unsuccessful Attempts, 237
San Jeronimo, Oil Tank Steamer, Trial Trip, 209
Self-propelled Vessel Passes through Panama Canal, 153
Shipbuilding Industry, Agreement, 606
Steering Gear, Electric, Suggested for Motor Cars, 509
Submarine Disaster Prevention, Inventions Considered, 537
Submarine Disasters, Invention for Procuring Supply of Air, 427
Submarine Raising Experiments at Venice, 459
Suez Canal, Ships' Maximum Draught, 677
Tug, Trial of, Edward Hayes, 107
United States Naval Collier Jupiter, 375
Vaterland's Maiden Trip, 537
Vaterland's Trials, Good Results, 509
White Star Liner for the Liverpool–New York Service, 291

SILVER Mine Owned by New York Central Railway, 349
Silver for Photography, Extensive Use, 537
Skill and Experience, Increasing Value of, 705
Smoke-box Cinders as Fuel, O. Nerger, 195
Solar Observatory in New Zealand, Address by Miss Proctor, 483
Status Prize, 12
Steam Boiler Working in Central Stations, J. W. Jackson, 401
Steam Boilers Heated by Submerged Firing, Brünler System, 181
Steam Raising by Combustion of Liquid Fuel Directly in Contact with Water, 677
Street Lighting in Europe and America, 455
Subsidences in the Tees Salt District at Haverton Hill, 537

T

TAR Distillation from Coal, Temperature Limits, 677
Taxi-cab Calling by Automatic Telephone Machine, 291
Taxicabs in Vienna, 99
Teachers in Technical Institutions, Association of, Conference, 561
Telegraph and Telephone Poles, Need of Special Treatment to Prevent Decay, 15
Telegraphic Experiments at Birmingham, 41
Telephone Cable between Carnarvonshire and Howth, near Dublin, 15
Telephone Call Check Meters, 705
Telephone Calls, Postmaster-General's Letter, 593
Telephone Failures due to Weather; Advantage of Underground Wires, 237
Telephones in England and America, 455
Temperature in Cotton Weaving Sheds and Coal Mines, Question of Limit for Working, 593
Test Holes Drilled and Dye Used to Determine Character of Rock for Foundations, 209
Testing Machines at the College of Engineering, Poona, 67
Testing of Moulding Sands, Special Course of Instruction, 291
Tests of Acetylene Motor, Favourable Results Compared with Petrol, 237
Textile Machinery, Electric Driving, J. F. Crowley, 567
Thermo-galvanometer, F. W. Jordan, 593
Tin Recovery from Tin-plate Waste, 705
Tin in South China, 99
Tinned Provisions in Norway, Prohibition of Lead in Tin-plates, 509
Tires for Motors Without Rubber, 263
Tires, Non-rubber, for Motor Lorries, Prize Offered by Austrian War Ministry, 291
Tires, Wood Spring, Satisfactory Experiment by Mr. J. H. Knight, 125
Titanic, Memorial to the Engineers, 468
Tracing Cloth, "R. C.." 222
Trafford Park, 24
Trains—*see* Railways
Transference of Heat in Boilers, Evaporation Experiments, Professor O. Köchy, 71
Tripoli, Artificial Ice Supply in Excess of the Demand, 705
Tripoli, Great Increase in Port Trade, 649
Turbo Fans for Forced Draught, James Keith and Blackman Co., 304
Turpentine from Pine Forests in Asia Minor, 291

U

UNIVERSITY of Bristol, Degree of D.Sc. for Mr. C. F. Smith, 51
University College, Nottingham, 192

V

VANADIUM in Brass, R. J. Dunn and O. F. Hodson, 153
Ventilation of Steam Turbine Engine-rooms, 237

W

WAGONS for House Refuse Collections, 483
Watches for Use in the Royal Navy, Annual Trial at Greenwich Observatory, 125
Water Gas in Steel Works, Torgau, Good Results, 567
Water Service Pipes, Small, Cleaning, 291
Water Supply for New York, Ashokan Aqueduct, 181
Water-tube Boiler Explosion, 45
Willcocks, Sir William, as Consulting Engineer for United States Government Irrigation Work, 655
Wire Nail Manufacture in Japan, 15

WIRELESS TELEGRAPHY:

Banana Supply Assisted by Wireless Telegraphy, 71
Birds in Flight Affected by Wireless Telegraphy, 274
Canadian Wireless System Extension, 209
Coast and Shipboard Wireless Stations, Statistics, 45
Communication between Long Island, America, and Berlin, 4000 Miles Success, 209
French Inter-colonial Chain of Wireless Stations, 427
German Colonies, Wireless Telegraphy in, 82
High-speed Wireless Telegraphy Demonstration in the United Kingdom, 649
Imperator's Important Installation of Wireless Telegraphy, 45
Isle of Man and England, Need of Wireless Communication, 427
Lighthouses, Wireless, on the French Coast, 426
Marconi's Lecture in Rome, 320
Portsmouth Harbour, Extension of Naval Wireless Station, 263
Signalling and Wireless Telegraphy School at Harwich, 45
Train Equipment, Experimental, between New York and Buffalo, 181
Transmitting Station near Carnarvon, Largest in the World, 593
Wave Length and other Measurements in Wireless Telegraphy; New Type of Adjustable Condensers, W. Duddell, 263
Wireless Daily Newspaper, 677
Wireless Telegraphy in Southern Nigeria, 45

WIRELESS Telephony Experiments, Increasing Effectiveness, 705
Wireless Waves for Detection of Subterranean Springs and Ore Deposits, Drs. Leimbach and Löwy, 677
Wood, Metal and Pottery Exhibition at the Mansion House, 483

X

X-RAYS Produced by New Method, W. D. Coolidge, 71

PRINTED FOR THE PROPRIETORS BY SYDNEY WHITE, AT THE OFFICE OF GEORGE REVEIRS, LIMITED, GREYSTOKE-PLACE, FETTER-LANE, E.C., AND PUBLISHED BY HIM AT THE OFFICE OF "THE ENGINEER," 33, NORFOLK-STREET, STRAND, IN THE PARISH OF ST. CLEMENT DANES, IN THE COUNTY OF MIDDLESEX.—FRIDAY, JULY 24, 1914.
